

Question 1

Function f is defined as $f: x \rightarrow |3x - 1|$.

Sketch the graph of f in the domain $-1 \leq x \leq 2$

Question 2

Function f is defined by $f(x) = |3x - 5|$

Sketch the graph of f in the domain $-1 \leq x \leq 5$.

Question 3

Function f is defined by $f: x \rightarrow |-5x - 1|$.

Sketch the graph of f in the domain $-2 \leq x \leq 2$.

Question 4

Function f is defined by $f(x) = |-6x - 5|$.

Sketch the graph of f in the domain $-2 \leq x \leq 2$.

Question 5

Function g is defined by $g: x \rightarrow |-3x - 2|$.

Sketch the graph of g in the domain $-2 \leq x \leq 2$.
